FinalEventsResolutionState Entry

onEntry(): notifyPhaseObservers(FINAL_EVENT_RESOLUTION) before onEntryActions()

loop

[for each active BuildingEffect (PhaseObserver)]

1 notifyPlayerResourceChanged(nickname, resource, newValue, delta)

No notifyPhaseChanged(FINAL_EVENT_RESOLUTION) is emitted.

Final Events Resolution (sorted by ascending priority — upper + lower rows)

loop

[for each final Event]

eventStart(type) on all EventObservers

opt

[an EventObserver produces deltas]

2 notifyPlayerResourceChanged(nickname, resource, newValue, delta)

3 notifyEventResolved(eventID: String, eventName: String)

applyEventEffect(players, eventObservers) -> emitOutcome

loop

[for each affected Player (HUNT, CAVE_PAINTINGS, SHAMANIC_RITUAL, SUSTENANCE, ...)]

4 notifyPlayerResourceChanged(nickname, resource, newValue, delta)

eventEnd(type) on all EventObservers

opt

[an EventObserver produces deltas]

5 notifyPlayerResourceChanged(nickname, resource, newValue, delta)

Transition

transitionTo(FinalScoringState) — see diagram L
