Broadcast (All Clients)

FinalScoringState Entry

onEntry(): notifyPhaseObservers(END_GAME) before onEntryActions()

loop

[for each active BuildingEffect (PhaseObserver) — e.g. end-game prestige bonuses]

1 notifyPlayerResourceChanged(nickname, resource, newValue, delta)

No notifyPhaseChanged(END_GAME) is emitted.

Final Score Calculation

calculateFinalScores()
(sums PP from Builders / Buildings / Inventors / Artists — internal update, no per-player notifications)
determineWinner()

The breakdown is included in finalRankings.

2 notifyGameEnded(winners: List<String>, finalRankings: List<PlayerFinalScore>)

logGameEnded() + close() + shutdown()
Game Ended
